ABOUT ME

As a technology enthusiast, I have a solid technical background in electronics, complemented with practical experience in programming and assembly through several projects of my own. Currently, I am studying a Systems Analyst degree

TECHNICAL SKILLS

Programming .NET - C# - C++ - C - JavaScript - HTML/CSS - SQL Server

Software Git – Microsoft SQL Server – Jira – Linux(cmd/server) - MySQL Workbench

EXPERIENCE

Backend Developer | Freelance | Mar del Plata, Bs. As 2024

Backend development projects using C#, and managed databases with Microsoft SQL Server

Full Stack Developer | Freelance | Mar del Plata, Bs. As 2020 – 2021

Web application development from scratch using HTML5, CSS and JavaScript

RELEVANT PROJECTS

H.I.L.E.T (CRUD System) [Front-End Repository](#) | [Back-End Repository](#)

Full Stack Developer

- Development of a complete academic management system using C#, Windows Forms and SQL Server.
- Design and implementation of a relational database in SQL Server, including CRUD operations for entities such as careers, subjects, students and exams.
- Creation of intuitive and functional user interfaces using Windows Forms with components such as DataGridView, TabControl and TreeView.
- Implementation of academic reports and statistics, with functionalities for export to PDF, Excel and JSON formats.
- Modular design of the system, facilitating the extension of functionalities and future maintenance thanks to Solid principles. In addition to using design patterns for the same
- Use of Agile methodologies such as SCRUM for project development.

eCommerce (designed to offer Russian language classes) [Front-End Repository](#)

Full Stack Developer

- Development of an educational web platform using Next.js and Vercel for the implementation and deployment of a dynamic site.
 - Responsive and accessible interface design using React and web technologies (HTML5, CSS3, JavaScript).
 - Integration of interactive functionalities such as direct links to WhatsApp and email contact forms for communication with users.
-

EDUCATION

Systems Analyst (In progress) | Instituto Argentino de la Empresa

Estimated graduation year : 2025

- Application development with C# and C++, applying OOP, design patterns and .NET development.
- Microsoft SQL Server database management and integration with C#.
- Experience in structured programming with C.
- Use of Agile methodologies such as SCRUM for project development.

Electronics Technician | E.E.T. 9N5

Year of Graduation : 2012

- Specialized in electronics with a focus on the development and optimization of electronic circuits, programming of PIC microcontrollers using BASIC language
